Summary

4+ years of experience in building of different projects (mostly using **JavaScript and React**) both from scratch and diving into an existing codebase.

In my previous companies, I went from junior to senior front-end developer and mentored new fresher. Currently I'm a front-end developer (**React, JavaScript**) in the **OCTAL security,** which is a branch of **Leviathan Security Group**.

Skills

Languages: React, JS, CSS, HTML

Technologies: Twig, Pug, Bootstrap, MaterialUI, Mantine, Css, Less, Sass, JQuery, Maquette, ES6+, React, Next.js, Redux, Thunk, Redux Toolkit Query, TypeScript, React Hook Form, Zustand, Enzyme, Jest, Testing library, GraphQL, AMPS, Gulp, Webpack, EsLint, Prettier, Husky, Yup.

Tools: Bitbucket, Gitlab, Jira.

Source Control: Git.

Methodology: Scrum, Kanban, TDD, KISS, DRY, SOLID.

IDE: Intellij IDEA, VS Code.

Accomplishments:
- ✓ I was the only one who made an admin site for pentesters from scratch.
- ✓ Optimized the project,with lazy loading of styles and scripts.
- ✓ Provided full project with Reactor native JavaScript.
- ✓ Good understanding of the project architecture.
- ✓ Successfully acquired webGL canvas.

Work Experience

React Developer, *OCTAL security, Kiev, Ukraine*   **Mar2023 - June2023**
Project: Kraken(vulnerability tracker)

Accomplishments:
- ✓ Study of new technologies:
  - Next.js
  - Zustand
  - Ramda
  - Mantine

Technologies: React, Next.js, Zustand, TypeScript, Ramda, Mantine, Strapi
